

Operating Instructions

Digital Video Recorder

Models: DLR3-08N/160CDV, DLR3-16N/160CDV,
DLR3-08N/410CDV, DLR3-16N/410CDV,
DLR3-08N/660CDV DLR3-16N/660CDV

Safety instructions

EMC class

- ▶ This video recorder (DVR) is a class A device in accordance with EN 55022.
- ▶ This device may cause interference to other equipment in domestic use. In such cases the persons operating the DVR are required to provide appropriate countermeasures, for which they themselves bear the cost.

Importance of these Operating Instructions

- ▶ Please read the safety instructions and the other information contained in the Operating Instructions before connecting up and operating the DVR.
- ▶ The Operating Instructions should be kept in a safe place for later reference.

Ambient conditions for the DVR

- ▶ The DVR should be protected against excessive heat, dust, damp and vibration.
- ▶ The DVR may only be operated at temperatures between +5°C and +40°C, and up to a maximum air humidity of 90%.
- ▶ The DVR may only be operated indoors, and must be protected against incursion of water and damp.

Care of the DVR

- ▶ Never switch on the DVR when damp has penetrated it. In such cases, have the DVR checked by a qualified service engineer.
- ▶ Do not place any heavy objects on the DVR.
- ▶ Never cover over the DVR's vents.
- ▶ Never insert metal objects or any other items into the vents. This may permanently damage the DVR.
- ▶ The housing may only be opened by authorised persons. Repairs may only be carried out by qualified service personnel.
- ▶ The DVR must be disconnected from the power supply before its housing is opened.

Getting started with the DVR

- ▶ When laying the connecting cables, make sure no weight is placed on them, that they are not kinked or damaged, and that no damp can penetrate them.

Cleaning the DVR

- ▶ The housing of the DVR may only be cleaned with a damp (not wet) cloth,
- ▶ Use only a mild detergent. Do not use solvent-containing detergents or petrol. This could permanently damage the surface finish.

Spare parts

- ▶ Use only original spare parts from Videor Technical GmbH.

Overview

Package contents

- Digital video recorder (DVR)
- Mains power cord
- Operating instructions
- RAS (Remote Administration System) software on CD
- Operating instructions for RAS software on paper and CD
- Mounting kit for cabinet installation

Basic functions

- Record video images using multiple cameras
- Event-based recording start
- Video playback
- Search for specific video sequences

Features

- MPEG-4 compression / duplex mode
- 8 or 16 loop-through inputs / VGA, FBAS outputs
- Alarm inputs / outputs
- Max. recording speed: 100 field images per sec (PAL)
- Memory capacity 160 GB / 410 GB / 660 GB
- Maximum video resolution 720 x 576 pixels
- Archiving/image transfer via USB and CD-RW
- Live picture & Playback Zoom (2x)
- Integral Motion Detector
- Telemetry control functions via RS-485 port
- Network connection (Ethernet)

Requirements for operation

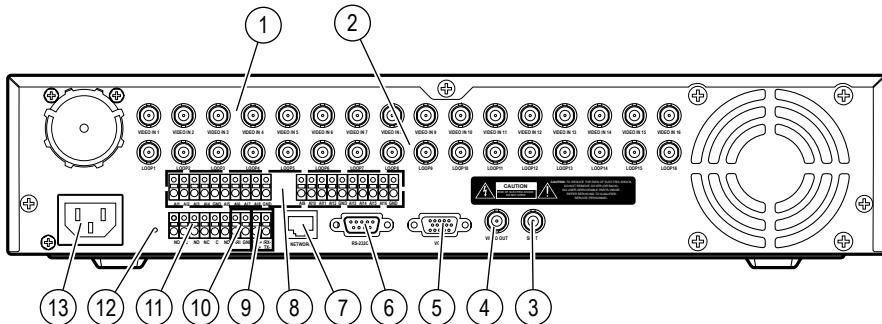

- Digital video recorder DLR3 connected
- At least 1 camera connected
- At least 1 monitor connected
- Mouse connected, if DVR is to be controlled by mouse

Control options

- Front panel
- Mouse
- RAS program

Connections on the rear

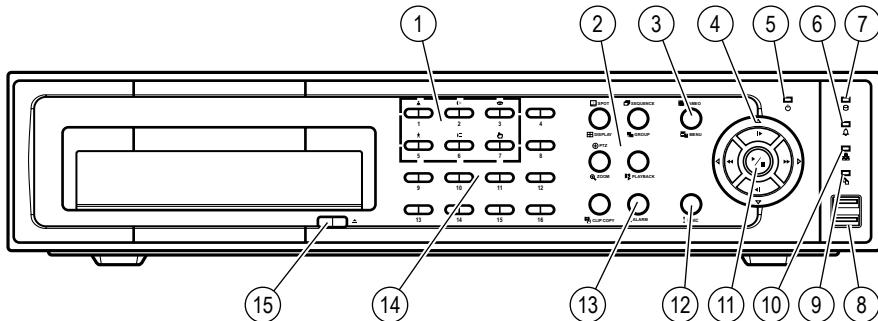

Note: Connections optionally for NTSC or PAL operation.

No.	Designation	Functions/connections	Example devices
1	VIDEO IN 1-16	Max. 16 video channels	Cameras
2	LOOP 1-16	Max. 16 loop-through video channels	Cameras
3	SPOT	Video output	Spot Monitor
4	VIDEO OUT	Video output	Monitor
5	VGA	PC monitor	PC monitor
6	RS-232C	External interface	Modem
7	NETWORK	Network	Network cable
8	AI1 - AI16	Alarm inputs for external devices	Sensors
9	/RX+, /RX-, TX+, TX-	External interface (RS-485)	Keyboard, PTZ camera
10	ARI/GND	Reset alarm with external signal	Switch
11	NO, C, NC	Alarm outputs for external devices	Siren, flashing light
12	Reset switch	Reset to factory defaults	-
13	Power supply	Mains power connection	-

Front panel controls

The following diagram and table set out the controls on the front panel of the DVR:

No.	Designation	Function
1		PTZ camera functions (secondary assignment)
2		Function buttons
3	MENU	Open/quit menu structure (primary assignment)
4	Menu navigation	Navigate and select within the menu structure (secondary assignment)
5		Power-on indicator when DVR is in operation
6		Display at alarm
7		Indicates hard disk operation
8	Connections	USB ports
9		Indicates recordings being copied
10		Indicates Ethernet or modem connection
11		Playback functions (primary assignment)

Menu structure

The following diagram shows the menu structure:

Menu structure, continued

The following diagram shows the menu structure:

Getting started

Checklist for DVR operation

Step	Action	Menu path
1	Connect peripheral devices as per planned setup.	
2	Specify menu language.	Setup Menu... > System > Information
3	Adjust date and time.	Setup Menu... > System > Date/Time
4	Set up user.	Setup Menu... > System > User
5	Set up network and desired notification channels (optional).	Setup Menu... > Network > ...
6	Register peripherals with DVR.	Setup Menu... > Devices > ...
7	Set up event types and associated responses.	Setup Menu... > Event > ...
8	Set up recording parameters and schedule.	Setup Menu... > Record > ...

Getting started, continued

Switching on the DVR

Requirement:

- The start-up preparations are complete.

Step	Action
1	Plug in DVR mains plug.
2	Switch on monitor. Result: System starts up automatically and is ready to use.

Accessing the Setup menu

Requirement:

- The DVR is switched on.
- You have set up a custom user name and password or you are using the following default access data (only when first accessing the Setup menu):
User name: admin
Password: (blank)

Step	Action	Menu path
1	Open Setup Menu... Result: Prompt for user name and password.	Setup Menu...
2	Log in as user.	

Switching off the DVR

Requirement:

- You have accessed the Setup menu.

Step	Action	Menu path
1	Shut down the system. Result: System shuts down automatically.	Setup Menu... > System > Shutdown...
2	After shutdown, disconnect the mains plug.	

Administration

Saving your system setup

You can save your DVR's setup data, including its network configuration.

Requirement:

- USB memory stick

Step	Action	Menu path
1	Insert a USB memory stick into one of the USB ports.	
2	Export your setup.	Setup menu... > System > Information > Setup Export...
3	Specify a file name.	
4	Export your setup.	Export

Loading your system setup

You can load your stored DVR system setup with or without its network configuration.

Requirement:

- USB memory stick with stored setup

Step	Action	Menu path
1	Insert a USB memory stick into one of the USB ports.	
2	Import your setup.	Setup menu... > System > Information > Setup Import...
3	Select the file name and, where appropriate, the network configuration.	
4	Import your setup.	Import

Deleting recordings

You can only delete all your recordings together. It is not possible to delete recordings from a specific time period.

Step	Action	Menu path
1	Delete all recordings.	Setup Menu... > System > Information > Clear All Data... or Setup menu... > System > Storage > Information tab > Using > Clear

Administration, continued

Downloading software updates

You can download software updates for your DVR from a USB memory stick.

Requirement:

- USB memory stick with latest software release

Step	Action	Menu path
1	Insert a USB memory stick into one of the USB ports.	
2	Start update.	Setup Menu... > System > Information > Upgrade...
3	Install new release.	

Hiding from specific users

You can hide video images and camera data according to the preset user rights.

Step	Action	Menu path
1	Set camera Covert mode.	Setup Menu... > Devices > Camera > Settings
2	Cancel 'Covert Camera View' access for specific users (groups).	Setup Menu... > System > User

Restoring factory defaults

Before restoring the factory defaults, you should export your current system settings in case you need to re-import them later. (see *Saving your system setup* and *Loading your system setup*)

Step	Action
1	Shut down the system.
2	Disconnect the mains plug.
3	Push a paper clip into the Reset button (on the rear of the DVR) and hold it there.
4	Plug in the mains plug.
5	Wait for all the LEDs to flash 5 times (about 30 seconds).
6	Withdraw the paper clip.

Administration, continued

Determining the memory requirement of a recording

The amount of memory recorded video sequences will take up depends on the following factors:

- Picture quality
- number of images per second
- duration

The memory requirement for 1 camera is calculated by this formula:

$$\text{Memory requirement} = \text{picture size} \times \text{duration of recording} \times \text{images per second}$$

Calculation example: CIF resolution (PAL):

Picture quality	Picture size	Duration of recording	Approx. memory space		
			5 images/s	10 images/s	25 images/s
Low	2.4 kB	24 hours	1.04 GB	2.07 GB	5.18 GB
Standard	4.8 kB	24 hours	2.07 GB	4.15 GB	10.37 GB
High	9.6 kB	24 hours	4.15 GB	8.29 GB	20.74 GB
Very High	14.4 kB	24 hours	6.22 GB	12.44 GB	31.10 GB

Calculation example: 2CIF resolution (PAL):

Picture quality	Picture size	Duration of recording	Approx. memory space		
			5 images/s	10 images/s	25 images/s
Low	4.8 kB	24 hours	2.07 GB	4.15 GB	10.37 GB
Standard	9.6 kB	24 hours	4.15 GB	8.29 GB	20.74 GB
High	19.2 kB	24 hours	8.29 GB	16.59 GB	41.47 GB
Very High	28.8 kB	24 hours	12.44 GB	24.88 GB	62.20 GB

Searching for recordings

Find first stored recording

Search → Go to the First...

Find last stored recording

Search → Go to the Last...

Find recording by date and time

Search → Go to the Date/Time...

Calendar search

For each camera the calendar search indicates:

- the days from which there are recordings
- the time ranges of recordings on those days

Search → Calendar Search...

Event log search

The event log search enables you to search for events based on specific criteria, such as:

- movements recorded by a specific camera
- alarm from a specific alarm input
- System events

Search → Event Log Search...

Text-in search

The text-in search enables you to search for recordings based on specific text inputs.

Search → Text-In Search...

Motion search

The motion search function can detect movements in recordings within defined zones for one camera. 2 types of motion search are possible:

- Motion search: Search for movement in a defined zone.
- Museum search: Search for movement of a defined object.

Search → Motion Search...

Copying recordings

Recordings can be written to a CD or copied to a USB memory stick.

Search → Clip-Copy...

Using calendar search

Performing a calendar search

Step	Action	Menu path
1	Open calendar search. Result: Calendar and time line are displayed.	Search > Calendar Search...
2	Select day and time	
3	Confirm input.	Go

Search  **Calendar Search...**

Term	Symbol	Meaning
		Date display ● Grey: No recording available ● White: Recording available
		Hours display ● White: Recording available
Select a Segment		If the date and time on the DVR have been changed (such as when switching to Summer time) there may be multiple recordings for one time from the same camera. They are stored in separate segments.

Using event log search

Performing an event log search

Step	Action	Menu path
1	Open event log search. Result: The result of the last search is displayed.	Search > Event Log Search...
2	Define criteria.	Option...
3	Confirm input. Result: List of search results is displayed.	Search
4	Select desired entry from list.	

Search ➔ **Event Log Search...** ➔ **Option...**

Term	Symbol	Meaning
From First	<input checked="" type="checkbox"/> ...	Start date
To Last	<input checked="" type="checkbox"/> ...	End date
Check Time Overlap	<input checked="" type="checkbox"/>	Activates a system prompt if there are multiple recordings for the same time range
Alarm-In	...	Alarm inputs in response to which a search for events is to start
Motion	...	Cameras on which to search for motion detection
Video Loss	...	Cameras on which to search for video loss
Text-In	...	Text input devices on which to search for events
Record Channels	...	Cameras on which to search for events
	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>	Search for system events: Setup Menu... > Event > System Event > Actions

Using text-in search

Performing a text-in search

Step	Action	Menu path
1	Open text-in search. Result: The result of the last search is displayed.	Search > Text-In Search...
2	Define text inputs.	Option...
3	Confirm input. Result: List of search results is displayed.	Search
4	Select desired entry from list.	

Using text-in search, continued

Search → Text-In Search... → Option...

Term	Symbol	Meaning
From First	<input checked="" type="checkbox"/> ...	Start date
To Last	<input checked="" type="checkbox"/> ...	End date
Channels	...	Text input devices on which to search for events
		Type of text input:
		Any Text-In Product
		Generic Text
		Epson
No.	<input checked="" type="checkbox"/>	Numbers of text elements to search for
-	▼	Linking operator for different query conditions:
		(blank)
		AND
		OR
Name	...	Text field by which the search should be made
Comp.	▼	Comparison conditions
Value	...	Numerical value against which the comparison is to be made
Column	...	Column number
Line	...	Line number
+	▼	Add new set of search parameter
Case Sensitive	<input checked="" type="checkbox"/>	Makes search case-sensitive
Load	<input type="checkbox"/>	Load saved search option settings
Save	<input type="checkbox"/>	Save current search option settings

Using motion search

Performing a motion search

Step	Action	Menu path
1	Display desired camera in single frame.	Display > Camera > ...
2	Open motion search.	Search > Motion Search...
3	Enter settings for motion search.	Option...
4	Confirm input. Result: List of search results is generated.	Search
5	Select desired entry from list.	

Search → Motion Search... → Option...

Term	Symbol	Meaning
From First	<input checked="" type="checkbox"/> ...	Start date
To Last	<input checked="" type="checkbox"/> ...	End date
Type of search:		
Type	<input type="button" value="▼"/>	Motion Search Search for movement in a defined zone Museum Search Search for movement of a defined object.
Zone	<input type="button" value="..."/>	Definition of motion-sensitive zones for motion search or museum search: See "Zone" on page 44.
Sensitivity of motion detection of:		
Sensitivity	<input type="button" value="▼"/>	1 (Dull) 2 3 4 5 (Sensitive)
Motion search only (not museum search):		
Min. Blocks	<input type="button" value="..."/>	Specify in how many motion-sensitive blocks motion must be detected as a minimum to trigger an alarm

Copying recordings

Copying recordings to CD or USB memory stick

Step	Action	Menu path
1	Find desired recordings. Note: Make a note of the data of the recordings you want to copy.	Search > ...
2	Define settings.	Search > Clip-Copy...
3	Start copying. Result: The recordings are copied.	Start

Search → **Clip-Copy...**

Term	Symbol	Meaning
Data Source	[]	Record
From First	<input checked="" type="checkbox"/> [...]	Start date
To Last	<input checked="" type="checkbox"/> [...]	End date
Channels	<input checked="" type="checkbox"/> [...]	Assignment of cameras from which recordings are to be copied
Password	[...]	Use password, if desired
Dest.	[▾]	Destination medium: Internal CD-RW USB-CD-RW 1. USB Storage 2. USB Storage 3. USB Storage
File name	[...]	Name of file on destination medium
Include Text-In Data	<input checked="" type="checkbox"/>	Activates use of Text-In data
Verify After Burning	<input checked="" type="checkbox"/>	Activates verification after burning
Progress	[]	Copy status

Menu descriptions – Setup menu

The Setup menu has the following sub-menus:

System menu

On the "System" menu

- the basic settings are made
- users are administered
- the system is shut down.

Network menu

On the "Network" menu the network settings are made. Network access provides access to all the functions of the DVR via

- RAS (Remote Administration System), independent of Internet Explorer

The DVR can be configured so that alarms trigger a notification by e-mail or notify an RAS.

Devices menu

On the "Devices" menu the connected peripheral devices are configured. Possible peripherals are:

- Cameras
- Microphones and speakers (through amplifier)
- Sirens and signal lamps
- Monitors
- Remote control for PTZ

Record menu

On the "Record" menu the following settings are made:

- Recording quality
- Timer control
- Duration of pre-event recording

Event menu

On the "Event" menu the following settings are made:

- Assignment of alarm inputs to alarms
- Configuration of motion-sensitive zones individually for each camera
- Definition of text input device and assignment to alarms
- Response to undesirable events

The event status is additionally displayed.

Setup menu

System – Information

On the “Information” menu

- basic information is entered and displayed
- software updates are installed
- recorded data are deleted as required

Setup Menu...  System  Information

Term	Symbol	Meaning
Site	<input type="button" value="..."/>	Location of DVR

Devices – Alarm-Out

On the "Alarm-Out" menu the alarm outputs are configured.

- "Settings" tab: The alarm outputs are configured.
- "Schedule" tab: Time slots are defined in which the alarm outputs respond in specific ways.

Setup Menu... → Devices → Alarm-Out → Settings

Term	Symbol	Meaning
No.	<input type="text"/>	Number of alarm output
Title	<input type="button" value="..."/>	Name of alarm output
Type	<input type="button" value="▼"/>	Contact method of alarm output: NO Normally Open NC Normally Closed
Dwell	<input type="button" value="▼"/>	Duration of alarm signal

Setup Menu... → Devices → Alarm-Out → Schedule

Term	Symbol	Meaning
No.	<input type="text"/>	Number of schedule entry
Day	<input type="button" value="▼"/>	Day of the week
Range	<input type="button" value="..."/>	Time range at 15-minute intervals
Mode	<input type="button" value="▼"/>	Response in defined period: On Continuous alarm Event Alarm in response to event Off No alarm
Channels	<input checked="" type="checkbox"/> <input type="button" value="..."/>	Enable • Alarm outputs • internal beep by DVR

Setup menu, continued

Devices – Display

On the "Display" menu the mode of on-screen display is configured.

- "OSD" tab: Specify what additional information is displayed on-screen.
- "Main Monitor" tab: Specify how the camera images are displayed on the main monitor.
- "Spot Monitor" tab: Specify which cameras are displayed on the spot monitors.

Setup Menu... → Devices → Display → OSD

Term	Symbol	Displayed symbol	Meaning
Progress			Activates display of:
Zoom	<input checked="" type="checkbox"/>		Visible when Zoom mode enabled
Network	<input checked="" type="checkbox"/>		Visible when DVR operating in a network
Freeze & Sequence	<input checked="" type="checkbox"/>		<ul style="list-style-type: none">• Freeze• Visible when Sequence mode enabled
Screen Group	<input checked="" type="checkbox"/>	1/4	Displays number of groups, and their ID numbers
Free Space	<input checked="" type="checkbox"/>		<ul style="list-style-type: none">• Visible when Recycle mode enabled• Remaining hard disk capacity, if Recycle mode not selected

OSD Margin...	<input type="button" value="..."/>	-	Distance of displayed symbols from screen margin

Setup menu, continued

Setup Menu...  Devices  Display   Main Monitor

Term	Symbol	Meaning
Modes of sequences in multiple playback:		
Mode	Full Sequence	All cameras are switched through sequentially.
	Cameo	Only the image at the bottom right is switched through; cameras in „Covert“ mode are not displayed to users without „Covert“ access.
Interval		Time interval between picture refresh
Event Monitoring On	<input checked="" type="checkbox"/>	Displays image of relevant camera in full-screen mode when an event occurs

Setup Menu...  Devices  Display   Spot Monitor

Term	Symbol	Meaning
Number of spot monitor output		
No.		
Channels		<ul style="list-style-type: none">● Cameras● Display time of recordings from cameras on spot monitor

Devices – Remote Control

On the “Remote Control” menu the remote control function is configured.

Setup Menu...  Devices  Remote Control

Term	Symbol	Meaning
Interface type of remote control		
Port		
Setup as specified by manufacturer:		
Setup...		Baud Rate
		Data Bit
		Stop Bit
		Parity
Remote Control Product		Remote control type as per specified list

Setup menu, continued

Record – Record

On the "Record" menu the basic settings for recordings and their quality are made.

Setup Menu... Record Record

Term	Symbol	Meaning
Recycle	<input checked="" type="checkbox"/>	Enables automatic overwriting of the oldest recordings when the hard disk is full Note: If not enabled, recording ends when the hard disk is full.
Resolution		Quality of recorded images Standard CIF High 2CIF
Event Record Dwell		Duration of recording when an event occurs
Auto Deletion		Specify time after which automatically deleted
Use Panic Recording	<input checked="" type="checkbox"/>	Enables the panic recording function Duration of panic recording
Panic Recording Duration		No Limit End panic recording by pressing PANIC button xx min. Panic recording ends after preset time or by pressing PANIC button
ips		Number of recorded images per second in panic recording
Quality		Picture quality of the recorded images in panic recording

Setup menu, continued

Record – Schedule

On the "Schedule" menu the schedule for recording is defined.

Setup Menu...  Record  Schedule

Term	Symbol	Meaning
Schedule On	<input checked="" type="checkbox"/>	Enables schedule entries Note: A recording is made only if schedule entries are enabled. Otherwise only panic recording is possible.
No.	<input type="text"/>	Number of schedule entry
Day	<input type="button" value="▼"/>	Day of the week
Range	<input type="button" value="▼"/>	Time range at 15-minute intervals
		Response:
		No Record -
Mode	<input type="button" value="▼"/>	Time Always record in the defined time slot in the quality set for "Time" mode
		Event Record only in case of event in the defined time slot in the quality set for „Event“ mode
		Time & Event Always record in the defined time slot in the quality set for "Time" mode, also in case of event in the defined time slot in the quality set for "Event" mode
Channels	<input checked="" type="checkbox"/> <input type="button" value="..."/>	Assignment of cameras to schedule
Settings	<input type="button" value="..."/> <input type="button" value="▼"/>	Picture data settings in Time and Event modes: ips Number of recorded images per second Quality Picture quality of recorded images
Default	<input type="checkbox"/>	Picture data defaults in Time and Event modes: ips Number of recorded images per second Quality Picture quality of recorded images

Setup menu, continued

Record – Pre-Event

On the "Pre-Event" menu the settings for recording prior to the event are made.

Setup Menu... Record Pre-Event

Term	Symbol	Meaning
No.	<input checked="" type="checkbox"/>	Activates the cameras
ips		Number of recorded images per second prior to the event
Quality		Picture quality of the recorded images prior to the event
Dwell		Recording time prior to the event Note: The pre-event recording memory capacity is limited. Consequently, the maximum recording time prior to the event, the number of recorded images and picture quality are inter-dependent.

Setup menu, continued

Event – Alarm-In

On the "Alarm-In" menu the alarm inputs and responses to events are configured.

Setup Menu... → Event → Alarm-In → Settings

Term	Symbol	Meaning
No.	<input checked="" type="checkbox"/>	Enables the alarm inputs
Title	...	Name of alarm input
		Contact method of alarm input:

Term	Symbol	Meaning
No.	<input type="text"/>	Number of alarm input
PTZ	 	Select PTZ cameras to record in event of alarm and select the desired settings
Spot Monitor	 	Select spot monitor on which camera image is displayed in event of alarm

Setup menu, continued

Event – System Event

On the "System Event" menu the self-diagnostics and corresponding messages are configured..

Setup Menu... → **Event** → **System Event** → **Health Check**

Term	Symbol	Meaning
System	<input type="button" value="▼"/>	System self-diagnostics interval
Check Recording	<input type="checkbox"/>	Setup... Configuration of schedule >>
Check Alarm-In	<input type="button" value="▼"/> <input type="checkbox"/>	Interval and status for checking alarm inputs

→ **Setup**

Term	Symbol	Meaning
Schedule On	<input checked="" type="checkbox"/>	Enables schedule entries
No.	<input type="checkbox"/>	Number of schedule entry
Day	<input type="button" value="▼"/>	Day of the week
Range	<input type="button" value="▼"/>	Time range at 15-minute intervals
Interval	<input type="button" value="▼"/>	Checking interval

Setup Menu... → **Event** → **System Event** → **Storage**

Term	Symbol	Meaning
Disk Bad Notify	<input type="button" value="▼"/>	Percentage of bad sectors on hard disk as from which an alarm is triggered
Disk Almost Full Notify	<input type="button" value="▼"/>	Percentage hard disk space available as from which "Disk Almost Full" alarm is triggered
Setup...	<input type="checkbox"/>	Configuration of data media S.M.A.R.T. check Opens a window in which the frequency rate and time and a temperature limit (in Celsius or Fahrenheit) for the S.M.A.R.T. check can be specified. If the temperature limit is exceeded an alarm is triggered. For details of your hard disk's temperature limit refer to the manufacturer's manual.

Setup menu, continued

Setup Menu...  Event  System Event  Actions

Term	Symbol	Meaning
Events (based on checks):		
Event		System check failed
		Panic recording in progress
		Recording check failed
		Check of alarm inputs failed
		Disk Almost Full Preset limit value for hard disk capacity reached
		Disk Full Hard disk full
		Disk Bad Preset limit value for number of bad sectors reached
		Disk Temperature Preset temperature limit reached
Alarm-Out	 	S.M.A.R.T. check failed
		Assign and enable
		<ul style="list-style-type: none">alarm outputsinternal beep by DVR
Note: Not possible for system event and panic recording		
Notify	 	Assign and enable notifications:
		Mail
		Modem (not in case of system event)
		LAN 1 to LAN 5 (not in case of system event)
		Alert Window (not in case of system event)
The selected function must be enabled: Setup Menu... > Network > Notification		

Setup menu, continued

Event – Event Status

The "Event Status" menu indicates the status of all possible events:

- Grey text: Event detection not enabled
- White text: Event detection enabled
- Flashing border: Message – acute event for 5 sec
- Yellow field: Pending event

Setup Menu... Event Event Status Event Status

Term	Event
Alarm-In	At alarm input 1 to 16
Check Alarm-In	Error detected at one of alarm inputs 1 to 16
Motion	Motion detected on camera 1 to 16
Video Loss	Video loss on camera 1 to 16
Text-In	Text input on text input device 1 to 16
Panic Record	Panic recording
Check Recording	On checking the recording
Disk Almost Full	On checking the data medium (only if DVR is not operating in Overwrite mode)
Disk Full	On checking the data medium (only if DVR is not operating in Overwrite mode)

Setup Menu... Event Event Status Storage

Term	Meaning
Type	Memory type
Disk Bad	Data carrier status
Temperature	Data carrier status
S.M.A.R.T.	Result of S.M.A.R.T. check

Specifications DLR3-08N/XX

Model	DLR3-08N/160CDV	DLR3-08N/410CDV	DLR3-08N/660CDV
EDP No.	71983	71982	71981
Video standard	PAL/NTSC (auto detection)		
Remark	-		
Event logs	Unlimited number of entries for alarm/event/text messages, loss of signal		
Security against unauthorised use	Key locking, 64 user groups with programmable access (up to 256 users)		
Transmission rate	100 images per sec (PAL)		
Alarm triggering	E-mail, pager, remote SW (RAS)		
Alarm activation	Automatic multi-screen display of alarm images programmable		
Remote Control	-		
Text display interface	ATM/POS, 10 channels max.		
Monitor display	Real-time playback: 25 field images per sec (PAL), 30 field images per sec (NTSC) per camera		
Covert camera mode	Programmable		
Time synchronisation	Network time log, network time server		
System change log	Up to 5000 entries for login/logout, configuration changes, remote access, change of signal connection, disk read/write errors		
Zoom function	2x		
Playback	Frame image, 4-/8-channel split, PIP		
Post-alarm recording	Up to 15 minutes		
VGA	-		
Control interface	RS-485 port for PTZ control (verified logs: eneo-Fastrax, Pelco P/D) or keyboard connection for remote control		
Activity detection	Programmable 16 x 12 (192) grid, 5 sensitivity settings		
Simplex/Duplex/Triplex/Pentaplex mode	Duplex		
Video inputs	8x 1 Vp-p, (F)BAS, 75 Ohm, BNC, loop-through		
Monitor outputs	1x spot output 1 Vp-p, (F)BAS, 75 Ohm, BNC		
Video output	1x 1 Vp-p, (F)BAS, 75 Ohm, BNC; 1x S-VHS, S= 1 Vp-p, C= 0.3 Vp-p, 75 Ohm		
Resolution	720 x 576 pixels (display)		
Compression method	MPEG-4, higher compression rates with same picture quality enable maximum recording times		
Recording speed	100 field image per sec at CIF resolution (336 x 272 pixels/PAL), 50 field image per sec at 2CIF resolution (672 x 272 pixels/PAL)		
Picture size	Basic: 2/2.4 kB; Standard: 4/4.8 kB; High: 8/9.6 kB; Very high: 12/14.4 kB (NTSC/PAL). 2 times larger in High Resolution mode

Notes on disposal

Correct disposal of this DVR

WEEE (Waste Electrical & Electronic Equipment)

Applicable in the member states of the European Union and other European countries with a separate collection system

The marking on the DVR and on the documentation stipulates that it must not be thrown away in normal domestic waste at the end of its useful life.

General rules

- ▶ Avoid uncontrolled waste disposal: Please dispose of this DVR separately from other waste, so as to avoid posing a hazard to the environment and to human health.
- ▶ Recycle the DVR in order to aid the sustainable reuse of material resources.

Private users

- ▶ Contact the retailer from whom you purchased the DVR or your competent local authority to find out how you can recycle the DVR in an environmentally friendly way.

Commercial users

- ▶ This DVR must not be thrown away with trade waste. To clarify the conditions of disposal, check your purchase contract or contact your supplier.
